

Faye Business Systems Group Announces Strategic Partnership with Rising Cloud Enterprise ERP Software Vendor Acumatica

Leading software provider Faye Business Systems Group ([FayeBSG](#)) partners with Acumatica, the fastest-growing global provider of cloud-based ERP solutions to provide clients with an industry-leading Cloud ERP platform.

Woodland Hills, California (PRWEB) August 21, 2013

Faye Business Systems Group is pleased to announce their partnership with Acumatica, the fastest-growing global provider of cloud-based ERP solutions to small and medium-sized companies (SMBs).

Acumatica is a rising cloud enterprise resource planning (ERP) software vendor that delivers the benefits of cloud computing and software as a service (SaaS) without forgoing system customization, control, security, performance, or speed.

Faye Business Systems Group sells and develops innovative and expandable business software that can be easily and quickly implemented to help businesses prosper and grow. The partnership with Acumatica allows FayeBSG to increase the quality and breadth of software solutions offered to clients and to provide their market with a customizable, reasonably priced solution with unparalleled choices in deployment - on premise, hosted at a data center, or run in the cloud.

“We became an Acumatica partner, because we needed a cloud based ERP solution with hosting options, unlimited customizability, strong distribution industry functionality, and at a great price point. There is a huge demand in the market for a mature solution with these attributes, and Acumatica fits the bill” said FayeBSG CEO, David Faye. “Acumatica, the company, is also a compelling partner for us. They have an ambitious, innovative, and open culture and management team. We couldn’t be more excited to go into battle with them.”

Yury Larichev, CEO of Acumatica, said: "We are very pleased to welcome Faye Business Systems into the Acumatica family. We are a 100% partner channel and we believe in building our business together with our partners. Faye Business Systems is a leader in its field and we are excited to join forces with them to offer a true cloud ERP option that serves the diverse needs of their customers."

PRESS RELEASE

As an alternative to some of the other cloud ERP solutions in the market, Acumatica uniquely offers users the advantage of three choices of deployment —cloud, data center, or on premise. In addition, source code is available with all versions. Another unique advantage of Acumatica is their creative pricing model, not based on user count.

About Faye Business Systems Group

Faye Business Systems Group is a Southern California-based technology consulting and Software Company with over 25 years of experience helping growing companies become more profitable by working with them to optimize their financial and business systems.
