Sage MAS 90 and 200 versions 4.0, 4.05, 4.1	Sept 30, 2011

Key Concepts and Terms

- Extended Solutions
 - Over 1,000 titles of highly specialized features and functionality developed for specific customers to add to their Sage MAS 90 or 200 system
 - Main features and functionality of select titles have been identified to incorporate into the core product
 - <http://www.sagesoftware.com/mas90/extendedsolutions/>
- Product Update
 - A release in between major releases that delivers both maintenance functionality and product enhancements
 - Download available every 3-6 months as a valuable benefit of maintenance & support plans

Key Concepts and Terms

- Payment Application Data Security Standard (PA-DSS)
 - Worldwide information security standard assembled by the Payment Card Industry (PCI)
 - Created to help organizations prevent credit card fraud through increased controls around data
 - For software developers and integrators of payment applications that store, process or transmit cardholder data as part of authorization or settlement when these applications are sold, distributed or licensed to third parties
 - Most major card brands (i.e. MasterCard and Visa) will require merchants that use payment applications to be PCI certified by July 1, 2010
