

# Sugar Mobile *e*

## Sugar Mobile *e* *with Geo Mapping!*

Looking for additional functionality from the Sugar Mobile App like GeoMapping, Check-In, and more? Sugar Mobile Enhanced (Sugar Mobile *e*) by Faye Business Systems Group enhances the power of the SugarCRM Mobile App with cool new features not currently available in any other Sugar Mobile app.

Sugar Mobile *e* has all of the features of the existing SugarCRM Mobile App but was built as a completely standalone app. Sugar Mobile *e* is an entirely enhanced custom app built by FayeBSG.

Distance (miles): 15 Find Result Type: 3 Items

Name	Distance (miles)	Type
MGP Productions "Machine Gun Preacher"	14	Accounts
SLIM PICTURES	14	Accounts
Dakota Financial LLC	14	Accounts
Simi Valley Landfill & Recycling Center	14	Accounts
Brett Canter	2	Contacts
Pat Brown	4	Contacts
Chris Right	5	Contacts
Bobby Eckenberger	8	Contacts
John John	9	Contacts
Jeff Law	13	Contacts
William (Zimmer) Jeffers	12	Leads
Helen Hoffman	14	Leads
Paul Smith	14	Leads
Helen Hoffman	14	Leads
Karen Boles	14	Leads
Mary Luu	14	Leads

Sugar Mobile *e* users benefit from key features such as the Geo Location enhancement which allows you to select an account by location and view that account on a Google Map within the App. Using Sugar Mobile *e*, you can then enter a selected distance radius by miles, and then the app will pull up every one of your **accounts**, **leads** or **contacts** that are located within your selected criteria. In addition to the custom built Geo Location features in Sugar Mobile *e*, the app has the out of the box features of the SugarCRM Mobile App, but it all exists within the app itself - there is no bouncing between apps.

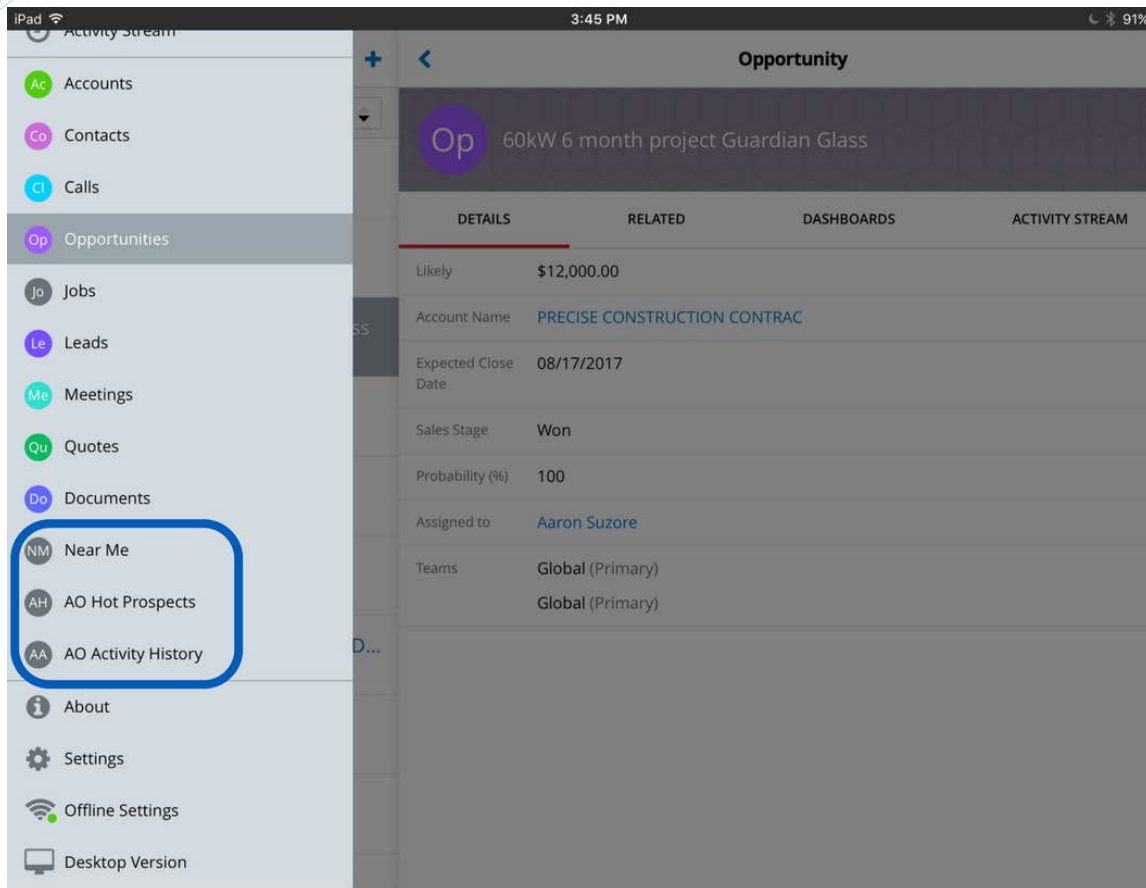

If your sales reps have the need to pull up nearby accounts based on their location, Sugar Mobile *e* will be their best friend. Gone are the days of mapping out accounts, contacts and leads before leaving for the day.

Sugar Mobile *e* users also benefit from having the ability to "check in" with one click to accounts and leads, eliminating the cumbersome action of having to log meetings in the app.

For Act-On Marketing Automation users, they also get the complete feature set of Act-On's Activity History and Hot Prospects. Users get access to all marketing activities captured with the Act-On integration, including real time mobile access to recently opened emails, website visits, forms submitted, webinars attended, media downloads and social media posts.

Sales users will benefit from Act-On integrated in Sugar Mobile *e* by having the complete marketing activity of an organization at their fingertips.

# Features of Sugar Mobile e

- Full functionality of SugarCRM Mobile App with added Geo Location Features.
- Full functionality of Act-On Activity History and Hot Prospects.
- Geo Location functionality is served from within the Sugar instance and therefore the same functionality is available in a Sugar browser and the mobile application.
- Works with the current running device's location to find the nearby records of types Accounts, Contacts and Leads.
- Finds and presents the nearby records from a certain selected record with a user defined radius.
- Check-in ability where a Sugar user can check into his/her location from the mobile application. A record will be created if the check in location is within certain proximity of the desired record's location.
