

## Software Integrations for SugarCRM

Software that stands alone can result in silos, redundant data entry, duplication of effort, unintended errors, and unhappy people. Wow that sounds bad. When you integrate software, you're bringing software and people together. FayeBSG integrates software with SugarCRM for fewer errors, greater productivity, faster access to data, and streamlined operations. Sounds like a recipe for happy people. Right?

FayeBSG software integrations for SugarCRM include integrations with ERP and accounting software, marketing platforms, document storage solutions, credit card processing, project management, phone systems, and more.
